Scoping Project Update

External Tagging Analysis and Assessment Model Design

Arni Magnusson

SPC PAW Meeting
26 March 2026, Nouméa

Overview

Data and Model *model fit to data, structural uncertainty*

Results *stock status, relative stock size, fishing mortalities*

Innovations *simplified regional structure, Lorenzen M, catch-conditioned, estimation uncertainty*

Issues *convergence/jittering, narrow confidence intervals, likelihood conflict between length and weight comps, no recruitment in one area*
